# Part I

## Introduction

This document serves as Worrалop Srichainont’s personal L<sup>A</sup>T<sub>E</sub>X template for lecture notes and assignment reports. You can find the source code published in my GitHub repository. It features a simple cover page, a table of contents, and code snippet formatting using the `minted` package. It also fully supports ภาษาไทย (Thai language) using the THSarabunPSK font. You are free to use and modify this template without any restrictions.

Before compiling this document, you will need to install the Pygments library for the `minted` package. You can easily do this in your terminal using the following command:

```
1 pip install Pygments
```

For your L<sup>A</sup>T<sub>E</sub>X editor, **Overleaf** is the easiest online option. If you prefer to work locally, you can install L<sup>A</sup>T<sub>E</sub>X on your computer via **MikTeX** and use a text editor such as **Visual Studio Code** or **TeXMaker**. Please note that using Visual Studio Code requires an additional plugin, such as the LaTeX Workshop extension by James Yu.

To successfully compile this document, please select **XeLaTeX** as the compiler in Overleaf or your local editor’s settings. Alternatively, you can manually run this command in your terminal:

```
1 xelatex -shell-escape -interaction=nonstopmode template.tex
```

Lastly, the remainder of this document serves as a practical demonstration of various L<sup>A</sup>T<sub>E</sub>X commands. It includes examples of text formatting, lists, tables, mathematical notation, images, and code snippets. Feel free to explore the following pages as a helpful reference. I hope you find this template useful for your coursework and projects, and please enjoy using it!

## Part II

# Text Formatting

## 1 Font Styles

L<sup>A</sup>T<sub>E</sub>X has various of font styles just like other document editor such as Microsoft Word.

### 1.1 English

| Command                        | Example            |
|--------------------------------|--------------------|
| <code>text</code>              | Normal text        |
| <code>\textnormal{text}</code> | Normal text        |
| <code>\textbf{text}</code>     | <b>Bold text</b>   |
| <code>\textit{text}</code>     | <i>Italic text</i> |
| <code>\emph{text}</code>       | <i>Emphasized</i>  |
| <code>\underline{text}</code>  | <u>Underline</u>   |
| <code>\textsc{text}</code>     | SMALL CAPS         |
| <code>\texttt{text}</code>     | Typewriter family  |
| <code>\textrm{text}</code>     | Roman family       |
| <code>\textsf{text}</code>     | Sans serif family  |

### 1.2 ภาษาไทย

| Command                        | Example        |
|--------------------------------|----------------|
| <code>text</code>              | ข้อความ        |
| <code>\textnormal{text}</code> | ข้อความ        |
| <code>\textbf{text}</code>     | <b>ข้อความ</b> |
| <code>\textit{text}</code>     | <i>ข้อความ</i> |
| <code>\emph{text}</code>       | <i>ข้อความ</i> |
| <code>\underline{text}</code>  | <u>ข้อความ</u> |

### 1.3 Sample Text

In Bangkok, **everywhere you look** is amazing food. To sound like a local, say *bhed nid noi* (เผ็ดนิดหน่อย), meaning *a little bit spicy*.

Navigate the city using Google Maps or the BTS Skytrain (รถไฟฟ้า). If writing a formal journal, you might start with CHAPTER ONE in the standard Roman font family. Wherever you go, remember the most important phrase: Sawatdee krap (สวัสดีครับ)!

## 2 Font Size

Font sizes are identified by special names, the actual size is not absolute but relative to the font size declared in the `\documentclass` statement.

### 2.1 English

| Command                           | Example       |
|-----------------------------------|---------------|
| <code>{\tiny text}</code>         | Tiny          |
| <code>{\scriptsize text}</code>   | Script size   |
| <code>{\footnotesize text}</code> | Footnote size |
| <code>{\small text}</code>        | Small         |
| <code>text</code>                 | Normal size   |
| <code>{\normalsize text}</code>   | Normal size   |
| <code>{\large text}</code>        | large         |
| <code>{\Large text}</code>        | Large         |
| <code>{\LARGE text}</code>        | LARGE         |
| <code>{\huge text}</code>         | huge          |
| <code>{\Huge text}</code>         | Huge          |

### 2.2 ภาษาไทย

| Command                           | Example       |
|-----------------------------------|---------------|
| <code>{\tiny text}</code>         | เล็กมากที่สุด |
| <code>{\scriptsize text}</code>   | เล็กมาก       |
| <code>{\footnotesize text}</code> | เล็กลง        |
| <code>{\small text}</code>        | เล็ก          |
| <code>text</code>                 | ปกติ          |
| <code>{\normalsize text}</code>   | ปกติ          |
| <code>{\large text}</code>        | ใหญ่          |
| <code>{\Large text}</code>        | ใหญ่ขึ้น      |

| Command                    | Example    |
|----------------------------|------------|
| <code>{\LARGE text}</code> | ใหญ่มาก    |
| <code>{\huge text}</code>  | ใหญ่มากมาก |
| <code>{\Huge text}</code>  | ใหญ่ที่สุด |

## 2.3 Sample Text
